Lightweight Handbell Tables & Accessories

Our transportable table is designed with you in mind. We use a finished 3/8" Lite Ply with a High Pressure Laminate "HPL" top which is more impact-resistant than wood. A crimped aluminum edge protects the finished top for years to come and will not warp. Our tables are stronger and easier to set up, thanks to durable steel legs and a secure locking system. They're sized for flexible set-up and comfortable ringing—36" long by 30" wide—and they're height adjustable from 29" to 42". Each weighs 30 lbs.

Suggested MasterTone Mallet Sets

Which mallets you'll need depends on your choir and your music, but we can make some recommendations. This table shows the quantity of each mallet usually needed for various choirs — two mallets per position; it's a reliable ordering guide. If you'd rather experiment, order one mallet in each range for the octaves you own, and let your ear be your guide for filling out your set of MasterTone mallets.
