# Nobody Cares For Your Handbells Like Schulmerich.

## Protect your investment.

Nobody but Schulmerich can provide factory-certified refurbishment of your Schulmerich handbells. So when it's time to think about refurbishment, trust your bells to the master artisans who brought them to life.

## Protect your guarantee.

Factory-certified refurbishment assures the continuation of your Schulmerich Lifetime Guarantee. If your bells were purchased on May 15, 1984 or prior – before we started our Lifetime Guarantee – here's good news: Get a Complete Refurbishment, and we'll include full guarantee coverage.

Experience has taught us that we'll need only ten working days to take proper care of your bells. So check your calendar for a convenient time, refer to the Refurbishment Order Form that you'll find on the next page, and contact us for scheduling. Remember to allow time for shipping.

## We'll make it easy.

If you can bring your bells in, that's fine. If not, we'll advise you on preparing them for shipping. Be certain that all cases carry your contact info both inside and out, and make sure that they're boxed in sturdy cartons.

## Two levels of service.

Choose whether your bells need a top-to-bottom *Complete Refurbishment* or our basic *Clean, Polish, & Adjust*.

## The essential services.

Here's what we do in our factory, whether you choose *Complete Refurbishment* or *Clean, Polish, & Adjust*:

- We disassemble and inspect each handbell.
- We polish your castings.
- We reassemble your handbells.
- We adjust clapper assemblies for best performance.
- We vacuum your cases and package each bell in a plastic bag for return to you.

And that's just the beginning. Because next you get to choose the refurbishment package that suits your bells best.

## Complete Refurbishment.

Choose *Complete Refurbishment*, and add these services...

- We install new handles.
- We install new Master Touch™ Guardian Discs.
- We install new yoke assemblies and your choice of Select-A-Strike™ or redesigned Quick-Adjust™ clapper heads.

In other words, Complete Refurbishment produces essentially a new handbell upon your original casting.

## Clean, Polish & Adjust.

Choose *Clean, Polish, & Adjust*, and we do the following in addition to the *essential services* above.

- After disassembling and inspecting your bells, we contact you with our service recommendations.
- We replace all anti-friction washers, bumpers, stop nuts, handle lock-washers, and handle (cap) screws.
- With your approval, we replace other necessary non-warranty parts. These charges are not included in Clean, Polish, & Adjust, and will be billed in addition to our basic charges.

## Optional Polishing Method.

We're now offering an alternative polishing method — available whether you choose *Complete Refurbishment* or *Clean, Polish, & Adjust*. It significantly reduces the machining used in traditional polishing methods, substituting a more hands-on, less aggressive technique. We recommend it especially for sets that have already had several prior refurbishments.

The Optional Polishing Method costs a little more per octave. We check all bells we receive, and we'll notify you by phone if we think your bells would be better served with this method. Or you can choose it to begin with.

### Caution:

*Aggressive polishing methods used elsewhere may alter the tuning tolerances established by Schulmerich, which could in turn affect the sound of your bells and your warranty.*

*We'll never compromise the sound of your handbells in an effort to restore their original finish. This means that some severe blemishes — those whose removal would require excessive machining that could affect the bell's pitch — may not be completely gone when we're through. This is especially true of our gentler Optional Polishing Method.*

**While refurbishing your handbells, why not upgrade to our all-new Ring 'N' Roll Cases? Call 800/772-3557 for details.**
